

Growing Guide

Indoor Start

- Begin seeds indoors 8-10 weeks before last frost.
- Use seed trays with a heat mat for germination.
- Keep soil warm and moist.

Hardening Off

- Gradually acclimate seedlings to the outdoors.
- Increase outdoor time in stages.
- Avoid direct sun at first.

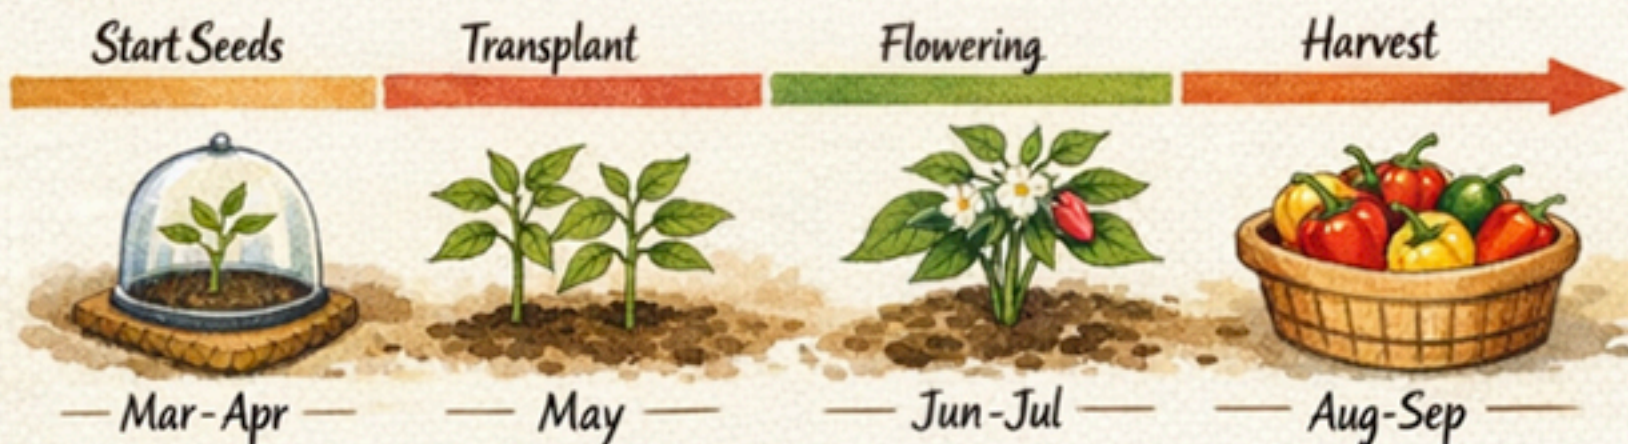

Planting Outdoors

- Transplant after the danger of frost has passed.
- Select a sunny spot with well-drained soil.
- Space plants 12-18 inches apart.

Watering & Care

- Water consistently, but do not overwater.
- Add mulch to retain moisture.
- Support plants with stakes if needed.

Seasonal Timeline

Gardening Tips:

- Rotate crops each year.
- Watch for pests like aphids and spider mites.
- Feed with balanced fertilizer.
